

Uthoff Hybrids is a multi-generational owned and operated family farming business located south of Cedar Rapids, Iowa. Founded in 1978 by Vince and his parents, Orville & Marie. Since 1996, Vince & Ann Uthoff have operated the business. In 2018 Jordan & his wife, Kaci, joined the family business. We pride ourselves on being a regional seed corn company. We also farm, raise cattle, so we know what issues farmers can face during the year. We produce, condition, and sell top yielding hybrids. Our goal has always been to provide quality seed at a reasonable price. Our customers have always said 'We have had good luck with Uthoff Hybrids' 'The Good Luck Corn'.

'THE GOOD LUCK CORN'

**Conventional
Corn Hybrids**

2026

U099 99 Day

Excellent agronomics on a hybrid that can go north very well. Can be planted early season south of Highway 30 for early harvest without sacrificing yield.

U301 101 Day

Excellent corn on corn conventional hybrid. Long girthy ear. Works well on all types of soils. Good fall appearance and stay green.

U303 103 Day

Conventional only hybrid with a medium plant height with good fall intactness. This hybrid brings a good disease control package for gray leaf spot and Goss's Wilt. This hybrid has showed strong test weight results.

U403 103 Day

Consistent performing hybrid that works on variable soils with superior stress package. This hybrid brings natural disease tolerance to Tar Spot, Northern Corn leaf blight, and Goss's wilt.

U404 104 Day

Medium plant height, with high test weight. Excellent Goss's wilt and tar spot ratings. Good Late season health and agronomics. This hybrid does not need high plant populations for best results.

U405 105 Day

Good ear girth with 18-22 rows per ear. Hybrids does not need high planting populations for best results.

U505 105 Day

New!

Attractive hybrid with excellent tolerance to tar spot and southern rust. This hybrid performs well across variable soils and planting conditions, with good seedling vigor.

U206 106 Day

Medium ear placement & good stalk strength. Very high root rating, large girthy ears with deep kernels. Very good ear flex. Likes productive soil and moderately productive soils alike.

U607 107 Day

Semi Flex ear with above average test weight. This is a very attractive hybrid that has been a top yielder in our test plots that past two years.

U408 108 Day

High grain quality hybrid with impressive test weight results. This is a shorter plant with very consistent ear height. This hybrid goes north of Hwy 30 very well.

U508 108 Day

New!

Consistently healthy hybrid that stands well late season. This is a well-balanced hybrid that brings strong test weight and grain quality. This is the top choice for tar spot in our lineup.

U209 109 Day

Tall hybrid works well across variable soil types and environments. Good choice in our lineup for silage corn for tonnage.

U309 109 Day

Semi-flex tapered ear with excellent test weight. This hybrid has a superior disease package and stands very well late season.

U112 112 Day

This dual purpose hybrid has excellent agronomics and disease ratings. Hybrid will stay green and stand well late season.
