

Uthoff Hybrids is a multi-generational owned and operated family farming business located south of Cedar Rapids, Iowa. Founded in 1978 by Vince and his parents, Orville & Marie. Since 1996, Vince & Ann Uthoff have operated the business. In 2018 Jordan & his wife Kaci joined the family business. We pride ourselves on being a regional seed corn company. We also farm, raise cattle, so we know what issues farmers can face during the year. We produce, condition, and sell top yielding hybrids. Our goal has always been to provide quality seed at a reasonable price. Our customers have always said 'We have had good luck' with Uthoff Hybrids' 'The Good Luck Corn'.

Herculex Trait Hybrids

U109Hx
109 Day

Corn borer resistance in our most popular full season hybrid. Medium ear & plant height. Excellent standability. Semi-flex ear with large kernels, nice dry down.

HERCULEX® I
Insect Protection

Agrisure Traits Hybrids

U099-3110
99 Day

Glyphosate and Liberty tolerance. Excellent agronomics on a hybrid that can go north very well. Can be planted early south of Highway 30 for early harvest without sacrificing yield.

U102-3110
102 Day

Glyphosate and Liberty tolerance. This has been a very consistent hybrid that also works well for silage. This hybrid will perform across all soil

types.

U507
107 Day

NEW FOR 2022! Hybrid with excellent agronomics and fall intactness. Girthy ears with medium ear height makes this a good choice for a traited hybrid. Available in Agrisure Above (AA) and Duracade (D)

Duracade™

Agrisure Above

Liberty Link Hybrids

U106LL
106 Day

Tall plant with high ear placement. Healthy plant, good silage hybrid. Large girthy ear with deep kernels and open husks. Strong stalks & roots.

U407LL

107 Day

Good stress hybrid with Liberty Link resistance. Improved stalks, roots and late season intactness from other Liberty Link Only Hybrids.

U208 LL

108 Day

Goss' Wilt & Northern corn leaf blight resistance. Set pop. @ 30,000-34,000 short husks on semi-flex ear.

U109LL

109 Day

Proven hybrid with Liberty Link trait. Offers high yield potential. Semi-flex ear. Good plant health. Medium tall plant. Corn bores have targeted this hybrid in the past.
